University to Again Try Prohibition

There is a prohibition issue at the University of Alberta at the present moment and it is stated in the Gateway, the University's newspaper, that the authorities will ask the Senate to ratify a resolution prohibiting the use of liquor in residences.

Prohibition of liquor in residences was repealed in 1929 and the House Committee charged with responsibility of enforcing discipline. This according to The Gateway, has not proved satisfactory and "this year several flagrant violations of the understanding as to the use of liquor have necessitated the return of the former state of affairs."

The question of student government arises again and apparently the student body is still sensitive of the unfortunate publicity they got at the trial of an action arising out of an "inhibition" last year. For The Gateway says editorially:

"The position of the authorities is extremely difficult. They are held responsible for the conduct of one of the students. The conduct of one of the students is not only a disgrace to the university but also a disgrace to our 'hospitality' become current we can hardly expect the Legislature not to cut our grant."

It has been amply proven that the students themselves are not competent to deal with the breach of the regulations, concerning liquor. We do not feel the House Committee are to blame in this respect, nor can there be any criticism of them because of recent happenings.

Enforcement of the prohibition then is to be delegated to a "special officer" in turn responsible to the Provost—the official who, it will be remembered, did not care at one time to interfere with the affairs of the self-governing student body.

We feel it will find many to agree with the opinion that the University authorities are following the proper course in prohibiting liquor in student residences. It will probably save many trouble to parents to learn that it has not always been so. But the new rule, The Gateway concedes, "the extremely popular in the province generally." The pity is that it should have required "recent happenings" to bring it about.

Doukhobors Will Lose Franchise

Ottawa, May 17.—All Doukhobors in the Dominion, whether Canadian born or not, are to lose their franchise under the new Election Act which the Federal government has drafted.

Furthermore, the revising officers of the lists become the sole judges of the language qualifications of any applicant for the franchise. They may determine whether or not he has the knowledge of either English or French which might be expected from him, having regard to his status and condition of life.

With knowledge of these two features of the new law becoming common property in parliamentary circles today, heavy storm clouds are gathering over the legislation. Liberals and C.O.F. members characterize the bill as in some respects "more drastic than the War Time Elections Act."

The bill has been printed, but not introduced in the House. Until it is laid upon the clerk's table it is not, technically speaking, a bill at all, but simply draft proposals.

As to the Doukhobors' disfranchisement, except for the fact that the subject is specifically named, there is a precedent for such action in legislation passed in 1931 by British Columbia. The coast province, however, refrained from naming the particular sect, and achieved the same object simply by stating that no sect could vote if its tenets prevented its members from bearing arms in the cause of the state in case of war.

The Federal government, however, has gone the length of naming the Doukhobors in the legislation. It is thereby laying down in effect, and for the first time, the principle that willingness to assume civic duties and obligations must be a condition of exercising the privilege of voting.

The bill is not regarded without some apprehension by the government's own followers, lest the prohibition of Doukhobors be represented as the thin end of the wedge against foreigners while the language question is questioned.

The government's view is that the legislation is not only fair, but a notable advance in the integrity of elections.

WEEKLY NEWS LETTER Dominion Experimental Station, Lacombe, Alberta

Assisting Horse Stork
Proves Profitable Job

With the rise in the horse market farmers are again beginning to raise colts. At this time of the year the horse's own particular stock is busy all over the country. Usually it does pretty good work, but if he isn't given a decent chance on a case he is inclined to let it go, and hurry on to the next. After all, it is a hard-worked fellow, and the least a farmer can do is to make things easier for him.

If the mare has been on light work, keep her at it until a few days before foaling, when the muscles of the crop will sink, the abdomen drop, and the udder fill. When these symptoms are noticed, put her in a clean, light, well-ventilated box stall, and let her exercise in a corral in the daytime. If the mare has been on pasture, foaling under natural conditions may be safer. Reduce the amount of grain fed, and increase the hay.

When parturition draws near, the mare grows uneasy, lies down and gets up continually, and sometimes bites at her flanks. Until she settles down and the foal arrives, hide quietly, ready to lend a hand if required. As soon as the colt is born, remove the mare from the stall, and if it does not at once begin to breathe, blow in its mouth, work its ribs, and rub its body.

If the mare colt is not broken in foaling, tie it tightly with a sterilized cord about two inches from the navel, cut it below this point, and disinfect thoroughly with full strength tincture of iodine, as a precaution against joint ill and other infections.

If in a stall, put the foal in a corner, on clean straw, and remove and burn the afterbirth. Clean the stall thoroughly, scatter lime on the bare floor, and then cover it with clean bedding.

For the first feed after foaling give the mare a bran mash. Do not feed any grain or hay for the first 24 hours. In two or three days, if she is doing well, put her back on dry feed. At the Dominion Experimental Station, Lacombe, the mares and foals usually get all their feed during the spring and summer from good pasture; but if the grass becomes short, a little grain is fed to keep the mare milking and the foal growing well.

BENTLEY WINS OVER LACOMBE

In the opening game of the Western Alberta Baseball League played here Friday night, Bentley came from behind to win over Lacombe by a 9-6 score.

W. Thorp replaced R. Garries in the box in the fifth inning and held Lacombe to a single run in the last three innings.

Left replaced McGarvey in the box in the sixth inning for Lacombe with the score standing 5-1 for Lacombe and Bentley scored five runs off him before he got his stride and ran in three more in the seventh to win the game.

Lacombe—Frizzell 3b, Hoppus rf, and lb, R. Lewis 2b, C. Lewis cf, Wilson lf, Penman ss, Vanvaseau 1b, McGarvey p, Jones c, Lett p.

Bentley—C. Garries 2b, A. Thorp ss, N. Damon c and rf, C. Hergott lf and c, Wright cf, Palmer 1b, Wilson lf, R. Garries p and 3b, W. Thorp 3b and p.

Umpire—Thos. Whitworth, Bentley.

Gull Lake Ready for The Holiday Season

Now that the holiday season is approaching a short write-up of our celebrated resort, Gull Lake is in order. It was over thirty years ago that Gull Lake first attracted a few summer vacationists, though it was known to hunters and trappers and timber men, before then and the early settlers of the district used it as a picnic grounds even before the Calgary-Edmonton railway was completed.

Since the first two or three summer homes were built on the lake shore some thirty years ago, hundreds of people have visited it and from these visits Gull Lake began to have a steadily increasing number of cottagers and campers, until today some four hundred cottages dot its wooded shores, and its famed beauty and recreational facilities have become known throughout the length and breadth of Alberta.

"Wiseville" of the past has become "The Village of Gull Lake," and as such continues to flourish and attract the holiday seekers of Alberta. Gull Lake has enjoyed a unique position, among the resorts of Alberta, receiving little publicity other than by word of mouth, with no publicity campaign ever instituted to bring its merits before the public, and despite the fact that newer and more commercialized summer resorts have sprung up in the past few years, it has still shown a steady advancement and even during the last four years of depression "newer and better summer homes have been built along its shores."

At the Centre of the Beach is situated the Alberta Government Park and Pier. Here are found camp kitchens, public bath houses, camping grounds, tennis courts, etc., for the use of the public. The government pier also is situated in front of the park. This structure is some four hundred feet in length and has on its far end two modern diving boards. A water slide, the largest in Alberta in the summer months is placed be-

side the pier, and, anchored further out is a huge floating diving platform. All these receive their full quota of amusement seekers during the summer season.

In the last few years many speed boats have been put on the lake, as well as sailing dingies, and the large expanse of water makes these two sports an ever popular pastime.

For the lover of the Dance, there are two large dance halls at the beach, with nightly dances an order of the season. No "rowdiness" has ever been tolerated at these dance centres, and the parents of boys and girls are assured that their children are in good company while attending a Gull Lake dance.

With ample wood to be gathered, bon-fires dot the beach at Gull Lake, nightly. Here the whole family can enjoy a camp fire, roast and sing-song, or just sit and watch the moonlight on the water in silent rapture.

Lacombe, situated on the Calgary and Edmonton highway, half way between the two cities, offers the traveller a modern shopping centre, with its stores and garages, the best stocked and equipped outside of the cities. Here prices are found to be the same as in Calgary or Edmonton, and the two hotels are among the best in Alberta. Its modern Hospital and good doctors, assure the visitor of peace of mind in case of emergency.

The C.P.R. operates three trains each way, daily from Edmonton and Calgary, and a daily train service is also operated from the West and West. The Greyhound Bus line also operates 4 times daily through Lacombe, with bus connections to Gull Lake. The C.P.R. freight service also serves Gull Lake as does Valen's Cartage Co. Van.

Heavy Rains Over District Make Crop Prospects Better

Removing the last shadow of doubt from the minds of farmers that moisture would be insufficient to give the crops a good start this spring, an additional inch and a half of rain fell in this district over this weekend.

At dawn Monday the rain continued to drizzle slowly, and the official forecast was "continued showers and cool."

A small amount of hail fell in this district but did little damage to crops which are too young to hurt. Showers were general over central and northern Alberta, and the official forecast was "continued showers and cool."

The recent rain was of the slow, soaking type which allowed every drop of moisture to become absorbed into the soil and, according to farmers, is the real "million dollar" kind of rain.

Weather reports Monday stated it was raining at Falher and Grouard in the Peace River country, while after the hail storm Red Deer to the south enjoyed a heavy "soaker." Drumheller, previously missed by rainstorms, reported heavy showers over the week-end. It came at a critical time, when farmers were preparing to fight the grasshopper menace.

LACOMBE & DISTRICT NEWS

Mrs. Dinwoody has returned to the home of her grandmother, Mrs. Green Sr.

Mr. and Mrs. Johnny Todd returned home on Monday last from Flatbush, Alta., where Mr. Todd has been building a barn.

Mr. and Mrs. Fred Kraft and family moved on Saturday last to their new home near Leedale, Alta. Everyone seems to be having a moving bee this Spring.

Mr. Johnny Ballard from Tees, Alta., spent the week at the home of her sister, Mrs. Roy Joslin.

Mrs. Webb Garner and Miss Amy Nixon went to Calgary on Friday to visit the optician, returning on Saturday.

Mr. Leslie Matheson returned home from the University.

Mr. and Mrs. Merle Whitney and family have moved to the Sinclair house. Merle is at present working for Mr. Fosnaugh.

Ernie Draper is busy as a bee these days, building a brooder for Lester Chisler. Here's hoping, Ernie, there will be more to build.

Mrs. Geo. Graham and girls left on Sunday to join Mr. Graham at their new home near Iola, Alta.

Mr. and Mrs. Neil McFarlane and Miss Martha visited over Sunday at the home of Mr. and Mrs. Geo. Hargrave.

Mr. and Mrs. L. B. Chiswell and family and Jack Jaffries spent Sunday at the Jack Vevers home.

Bill's friend said he was going to buy him a coop (coupe) and as Bill was asking for work he asked his friend what size he was going to build, and how many chickens he intended to roost in it. Bill's friend replied that he did not intend for chickens to roost in his coop (coupe) at least not the feathered kind.

ENGINEER KILLED IN WRECK

Kamsack, Sask., May 17.—Hurling down a 100-foot embankment when a road grade gave way at 1:30 o'clock last night, a freight locomotive carried its engine to death one mile east of Cote, and brought injuries to a fireman and brakeman. George Symes, engineer, Dauphin, Manitoba, was killed. Joe Clarke, fireman, Dauphin, and Roy Smith, brakeman, also of Dauphin, were injured.

Ten cars toppled down the embankment with the locomotive. Wrecking crews are busy restoring service on the Canadian National Railway line between Calgary, Saskatoon and Winnipeg.

The price cuts apply particularly to cordwood for fuel, fence posts and rails, shingles and lath, and various kind of lumber, exceeding 25 per cent. in some cases. Cordwood for fuel only is listed at 25 cents, a cord for green poplar and 75c. for other green wood, while fire-killed or dry timber goes at 25 cents. Fence posts are as low as one and two cents, poplar lumber logs one-half cent per foot, and shingles 25c. per 1000.

Call and see the new General Electric Refrigerators—Morrison and Johnston, Ltd.

The Douglas Social Credit Group are holding a meeting in the United Church Hall, on Thursday, May 24. E. E. Amley, speaker. Everybody come and bring your questions.

If you're keeping crows for their company, all right. If you're keeping them for profit, a new separator will help. See Morrison and Johnston, Ltd., the DeLaval Separator Agents.

Our Students Make Good at Musical and Dramatic Festival at Red Deer

Red Deer school inspectorate held on Thursday the first musical and dramatic festival, scoring a tremendous success, 550 entries representing the cream of the talent from 90 schools participating.

These competing were winners of elimination contests held at Rocky Mountain House, Eckville, Bentley, Sylvan Lake, Bentley, Rimby, Lacombe and Red Deer. Judging took place in three different centres, United Church, the high school and the public school. Besides the principal promoter, Inspector A. R. Gibson, local and dramatic competitors, their teachers, music teachers and accompanists, the adjudicators and others who contributed to the success of the day.

The adjudicators were: Music, Vernon Barford and W. J. Hendra, Edmonton; dramatic, and dramatic competition, Mrs. MacDonald, Edmonton; Miss Marriott, Camrose Normal school and Miss Mina Cole, Red Deer. In the evening a capacity audience in the United Church enjoyed a concert to which the festival's first prize winners contributed. Inspector Gibson presided, W. E. Payne, K.O., M.L.A., presented diplomas to the winners. Speakers were Vernon Barford, Mr. Payne and Mr. Gibson.

Festival results are as follows:
Grade 1—Lorna Wright, Springdale; Alice Spiercher, Symonds; Barbara Hay, Lacombe.
Grade 2—Peggy Milne, Milton; Edith Galkins, Lacombe; E. Nujala, Kamsack.
Grade 3—John Marshall, Woody Nook; Nancy Brett, Rocky Mountain House and Melba Hall, Red Deer (red); Elsie Tucker, Milton.
Grade 4—Amy Sheppard, Red Deer; Annie Leard, Clive; Alice McLean, Rocky Mountain House.
Grade 5—Elizabeth McCullough, Red Deer; Glen Sampell, Mountain Grove; Muriel Gibson, Red Deer.
Grade 6—Shana Little, Red Deer; June Grimes, Eckville; Audrey Appleton, Sylvan Lake.
Grade 7—Victor Wright, Lacombe; Oran Whitney, Red Deer; Donald Proudfoot, Springdale.
Grade 8—Grace Mills, Red Deer;

CHARGE WEMBLEY MAYOR WITH LICENSE PERJURY

Wembley, May 21.—G. Nelson, mayor of Wembley, appeared for preliminary hearing in Magistrate Galway's court, Friday, charged with perjury, and was remanded to stand trial at the June sitting of the supreme court, being released under bail bonds of \$2000.

The action was initiated through taking of affidavit after April 1 in order to secure the quarterly alibi license reduction. One witness appearing at the preliminary hearing testified he had refused to attest the affidavit, knowing it to be false.

The case has created considerable stir through the Wembley district.

NEW SUMMER SUITS

Dave Hay has the finest line of men's suits ever exhibited here. An exceptionally good range of patterns are on display and the new summer suits are in many different shades. Let Dave fix you for your summer suit and be assured of expert fitting. Don't buy your new suit until you see Dave Hay's new line.

The Red Deer Health District will hold a Clinic for examination of well babies and pre-school children in the Community Hall, Bentley, on Friday, June 1st, from 1:30 to 4:00 p.m.

GRIMM ALFALFA SEED

I have been able to secure a few hundred lbs. of this hardy seed. Phone 2, Wilkes, 48.

Wheat Prices And Economic Experiment

International experts of the wheat advisory commission have been engaged, at Rome, in studying ways and means of raising wheat prices, and according to press dispatches of recent date, have reached decisions which will be submitted to the governments of the signatory countries for approval and, it is presumed, concerted action. Decisions, it is stated, must be ratified in time to permit their implementation by June 1.

Details of the plan which have emanated, so far, from the conference at Rome, are not complete enough to warrant analysis with a view to computing their effects. Apparently, however, it is proposed to employ a price-fixing system to regulate exports rather than the commoner process of regulating exports to control price fluctuations. Apparently, too, the intention is to base the minimum price of wheat on the relation between export supplies and the month to month demand, with the London quotas rigorously adhered to by the exporting countries.

Nothing has been said so far as to the price objective. Undoubtedly, however, unless it be the 63.02 gold cent price computed as the "average price of all parcels of imported wheat of all grades sold during each week in all the ports of Great Britain," the terms of the London agreement, as they apply to the exporting countries, will be rendered nugatory. This is the price which, according to the agreement, must be reached and maintained over a period of sixteen weeks, before scaling down of customs tariffs begins.

Western Canada awaits with interest and expectation complete details of the proposals drafted by the experts for submission to the signatory nations. Price, of course, is a matter of paramount importance to the farmers of the prairie provinces, and if, by agreement, the world price can be raised and stabilized, a long step will have been taken towards stabilizing the agricultural industry in Western Canada. It is impossible here to talk of lowering production costs while debt and other charges remain as a high and uncontrollable overhead factor in them.

Of scarcely less significance to the prairie farmer is the matter of lower customs duties against Canadian wheat in the importing countries of Europe. If, then, in addition to raising world prices, there is an adjustment downward of tariffs associated with wholehearted efforts by the importing countries to increase consumption of wheat and at the same time to reduce domestic production, western agriculture may assume with some hope of fulfillment and success, the task of orienting itself to the new economic objective. That is to say, if the spirit of the London agreement is observed to the letter of its various terms, there is no obvious reason why, once the carryovers are disposed of, Canada's export quota should not progressively increase pari passu with her ability to consume the products of agriculture indigenous to her best customers. Signs already are conspicuous that the ultimate determinant of positive or negative reaction to the terms of the London agreement by the importing countries will be the "balance of trade."

Throughout the world, a series of exceedingly interesting and vitally important economic experiments are underway, with the various nations engaged in concerted efforts to set their own productive processes in order. The United States is seeking prosperity and stability through the agency of the Roosevelt "New Deal." Mussolini has his corporative state with industry, organized on a national basis, acting as "economic advisor" of the government. Germany is enacting recovery through a process of state intervention, and Austria apparently is preparing to adopt the Italian model. Russia, of course, is seeking to gear the productive machine to the needs of her people, through socialization. In Britain, the means to recovery is styled "rationalization." All the experiments have one element in common—government intervention, government control and government regulation. The same trend is patent in Canada, for recent legislation has laid foundations for a wide range of machinery for control and regulation, which is to be erected and made operative as conditions determine.

Chocolate As Bait

Mice Appar To Like It Better Than Cheese

Sweet chocolate is far superior to cheese as a mouse bait, extension workers of the Federal Department of Agriculture and the State Agricultural College of Colorado Springs discovered quite by accident. Stores of poisoned grain, intended for prairie dog and gopher extermination, were being raided by mice. Traps baited with cheese, were placed about the grain. The mice made off with the cheese until there was none left.

Then someone tried baiting a trap with some chocolate. Mice were caught by the dozen.

A lifeboat has been designed which is equipped with rotating rime at bow and stern on which it can be slid down beside of a ship safely no matter what the ship's position may be.

Sea Voyage To North

Governor Of Hudson Bay Company To Make Trip To Churchill

For the first time on record a governor of the Hudson's Bay Company will enter Hudson Bay this summer by the route pioneered in 1610 by the noted explorer, Henry Hudson, in his "Discovery."

P. Ashley Cooper, the governor, it was learned at Montreal, will board the Naoscapie at Montreal, July 7, accompanied by Mrs. Cooper, and travel as far as Chy-bill, to familiarize himself with the company's operations in Hudson Bay and the eastern Arctic.

First book printed in America was the "Escala Imperial de San Juan Chilo," no copies are known to be in existence.

About two-thirds of the road mileage in the United States still rates as "unimproved."

Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-over smothering, sinking sensations which over people, from time to time, are warnings that should not go unheeded; those extremely weakened condition of the nerves and other vital organs, and should be given immediate attention. These sufferings in the way will find in Milburn's H. & N. Pills a remedy with which to recuperate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

Thousand Miles An Hour

Amazing Things Predicted By Sir Charles Kingsford-Smith

Whirling through the stratosphere at well over a thousand miles an hour in the hermetically-sealed cabin of a giant air liner, guided entirely by wireless control stations on earth—can you imagine the possibility, Sir Charles Kingsford-Smith, hero of the recent record-breaking flight to Australia, believes this not only possible, but likely, in an astonishing vision of aerial development within the next fifty years he foresees air travel brought to such a pitch that ships and railways will become obsolete, their sole use being as carriers of heavy freight.

"There will be no human pilot, but gyroscopic control," said Sir Charles. "The huge flying liners which will move through the stratosphere at a uniform speed of 1,200 miles an hour, carrying 100 passengers in their luxurious cabins, will be fitted with super-efficiency, super-charged engines and variable pitch propellers.

"Risk will be negligible. Each plane will have ten, twelve or fifteen engines, all in the event of one cutting off, the officer in charge will simply detach that engine from the propeller while the rest of the plane is en route. Crude oil will probably be used as fuel."

Actually, to accomplish the amazing speed of which Sir Charles speaks we do not require more powerful engines than some already built. The atmospheric density 60,000 feet above the earth is about a quarter of what it is here, so that an engine, when under normal conditions to-day attains the high speed of 350 miles an hour, would hurtle through the rarified atmosphere at 1,400 miles an hour.

Rich Collection For Museum

B.C. University Receives Rare Specimens From Dr. Fraser

The University of British Columbia will be enriched by a collection of hundreds of species of marine life, many hitherto unknown to science as a result of an 8,500-mile cruise through the south Pacific by a scientific party of which Dr. C. McLean Fraser, professor of zoology, was a member.

Dr. Fraser returned to Vancouver after an absence of three months. He declared that the expedition involved very little romance, but much hard work. He expected the discoveries made in the comparatively virgin scientific field off the coast of South America will have important bearings in the study of marine flora and fauna.

The specimens collected ranged from snails and nudibranchs from the shore to sea serpents, brilliantly tinted "angel" fish and crustaceans. Dr. Fraser, being a world authority on a minute form of sea life known as hydroids, brought back a large number of formerly unknown types for the university museum.

PRICES RISE BUT TEA STILL MOST ECONOMICAL

Three years of disastrously low prices for tea finally goaded the grocers into action. Committees were formed a few months ago to control production. Prices have advanced and as soon as merchants have exhausted their present stocks the housewife will have to pay slightly more for her favourite beverage. Finest teas such as "Salada" still produce about 5 cups for a cent.

Light Refreshments

Police Of New York Evidently Have Hearty Appetites

New York's "finest" may not be either wealthy or wise, but they are certainly healthy, judging from the recent exploit of 6,000 policemen.

On a special occasion these "Coppers" had breakfast together recently and here is what they are reported to have eaten: 8,000 grapefruit, 1,200 pounds of oatmeal, 24,000 eggs (scrambled), 2,500 roast chickens, 4,500 pounds of potatoes, 12,000 sausages, and 1,000 pounds of sugar.

This light snack was washed down with 900 gallons of coffee, 800 quarts of milk and 1,250 quarts of cream. If the reader chooses, he can figure out the exact share of the average policeman for himself.

Value Of Birds

Rev. B. F. Henry of Pratt, Mass., in placing the value of the various species of birds, said the meadow lark is worth \$2 each.

"The robin," he said, "is worth its weight in gold." In setting the value of the robin, Rev. Henry declared it does great work in eliminating garden and lawn pests, while the meadow lark also helps the farmer by assisting in ridding his fields of the smaller pests.

World's Cheapest Air Rate

The world's cheapest air service has been inaugurated between Glasgow, Belfast, and London. The service will cost passengers not more than a penny a mile. Equipped with two motors of 480 horsepower each, the planes will carry 15 passengers and two pilots. The Southern Railway Company is now operating an air line between Croydon and the Isle of Wight.

Blazing Difficult Trail

Passage Being Made For Bedouin Canadian 1934 Expedition

Into the dark forest which surrounds Fort St. John, B.C., the big cabin settlement on the fringe of civilization, Tommy Wilde, ex-champion broncho buster, has gone to map and blaze trail for the Bedouin-Canadian 1934 expedition.

With Wilde went a crew of hard-boiled axemen and a train of pack horses. For twenty-five miles their job will be easy, for they will simply follow and widen the centuries-old Indian trail which runs from Fort St. John to Bear Flat.

Then they will head into the great unexplored area to the northeast of Bear Flat, and for 150 miles will blaze a path for the caterpillar tractors of the expedition—through forests, up mountains, down rocky gorges, over swollen rivers. Their destination will be Redfern Lake, nestled high in the upper Canadian Rockies, where they will wait to join the main body of the expedition.

The Bedouin-Canadian 1934 expedition is one of the most elaborately-equipped private scientific ventures ever undertaken in North America. Headed by Charles E. Bedouin, industrialist of New York and Paris, and a scientific staff, the expedition will include thirty persons, sixty horses, radio broadcasting and receiving equipment, several river craft, a hydroplane, motion picture apparatus, and the five caterpillar tractors which are being especially constructed abroad for the expedition.

Yacht Cup Race

Mrs. Sopwith Will Act As Timekeeper On The Endeavour

Mrs. T. D. Sopwith, who will act as timekeeper on her husband's challenging yacht, the Endeavour, when it attempts to cross the America's cup from the United States this summer off Newport, R.I., is anticipating the thrill of her life.

In every race of the series she will stand close beside Mr. Sopwith at the wheel, a stop-watch grasped in either hand, advising him to the second the time the Endeavour has made on each leg of the run, the time of its opponent, how they stand. It's important.

"I wouldn't miss it for anything in the world," she told the Associated Press when interviewed at the Sopwith's handsome town residence in Park Lane. "It always acts as timekeeper in our races, but this, of course, will be the biggest of all."

"You may be sure I won't wear trousers," she said. "Just a skirt and blouse and jacket. If there's a heavy sea I have a waterproof."

Historic Treasure Prized

Old Sword Once Flashed At Battle Of Waterloo

An historic sabre that once flashed in battle under the colors of King Louis XVI. of France is a relic highly treasured today by Auguste de la Tremontaine, who was established at Montmartre, Saak, 1893.

It is the sabre of the Grand-uc de Villabon, Tremontaine's brand-uncle, who was breveted lieutenant by Louis XVI. in 1785. The baron took part in all the campaigns of Louis XVI. including those of Napoleon on the march to and from Moscow, the battle of Waterloo and the defeat of Bonaparte. He died in 1838 and the sabre passed on to Tremontaine.

The 94-year-old pioneer of this little village migrated from France in 1873 and established his home at Chrysothem, Chautauquy county, Quebec. He moved west 20 years later.

Carves Replicas Of Ships

In a workshop overlooking the spot from which the Pilgrim Fathers set out, Fred Garner spends his days carving replicas of the Mayflower, and almost every trans-Atlantic liner which saves Plymouth harbor water to the United States such examples of his workmanship. His material, consists of the timbers of old battleships.

A rifle has been designed that will speed a bullet a mile a second. The shot is squeezed down a tenth of an inch of its diameter as it passes through the rifle bore.

It dries as it cleans—as it polishes. Appleford Paper Products, MONTREAL, CANADA.

Would Prevent Accidents

Suggestion For Two Motor Tail Lights Sounds Reasonable

Driving along the road at night, a red light may be seen ahead, out of headlights range. The motorist may, if he is that kind of driver, slacken speed and drive cautiously, until he is sure whether the light is on a moving car, one that is stopped, or a lantern on an obstruction in the road. If he is the other kind of driver, he may barge right ahead, and if the light is marking some kind of obstruction, the report of the accident can be read next morning.

On railroads, in navigation and in other lines of industry, a red light on the right-of-way signals danger. But on the highway, one driver's guess is as good as another's.

Many of the new model cars are equipped with two tail lights, one on each side of the car. The additional one has little use other than that of ornament, but it could easily be made to serve as a safety feature.

It would be a simple matter to have the one light equipped with a green lens, and arranged so that it is on only when the car is in motion. Then, at night, the sight of two lights—one green, one red—on the highway ahead would signify that the object was a car in motion. One red light only would indicate danger and cause the motorist to move along carefully. Such a system would prevent many had afterdark crashes.

Menace From Icebergs

Hundreds Drifting Toward Traffic Lanes Of Grand Banks

Wrapped in murky fog of their own creation, hundreds of icebergs are drifting eastward from the glaciers of Labrador and Greenland to the traffic lanes of the Grand Banks.

Increased in numbers beyond the usual output because of the severe winter, the icebergs already have been carried by the frigid Labrador current so near the Grand Banks that the shipping lanes of the North Atlantic have been ordered narrowed sixty miles eastward. Not in years has this drastic re-routing been necessary so early in the season.

America's outstanding expert on the northern ocean currents and their icebergs, Lieut. Commander Edward H. Smith, of the Coast Guard, predicts that before the icebergs menace is over, in July, at least 630 icebergs will have crossed the ship paths. In average years about 300 reach the Banks.

"It is a serious situation," Commander Smith said. "The unusual increase in bergs means that the vigilance of the international ice patrol, maintained by the United States with the financial co-operation of thirteen governments, must be doubled, the work intensified."

Fort McMurray Salt Well

Salt Plant To Provide Employment For Fifteen Men

Opening of a salt plant north of Fort McMurray, representing a cost of about \$30,000 and providing initial employment for 15 men, was announced by Alfred von Hammerstein, one of the pioneer landholders in that region.

The new concern, which will develop the property, located on the river 20 miles north of Fort McMurray, is the Triple A Salt Co., Ltd., of which Harvey Hammerstein, M.L.A., is president. Von Hammerstein will erect and manage the plant.

Capitalized at \$75,000, the new company has acquired 52 acres, forming part of the 12,000 acres held in that region for many years by Von Hammerstein.

Located on the property is a salt well, drilled by Von Hammerstein in 1910 to a depth of 800 feet, when he was in search of oil or gas. This well contains a bed of salt 100 feet in thickness, he reported.

Within three months, the plant will be in operation, while it is estimated that from 6,000 to 7,000 tons of salt will be produced during the season.

School Age At Eight

Children should not be permitted to go to school until they reached the age of eight, in the opinion of Dr. Laurence P. Kolom, president of the New England Council of Optometrists. "The eyes of the human being," he says, "do not reach the state of maturity until the child is eight years of age, and much of the unnecessary strain to which we subject the eyes of children in the classroom should be avoided to insure healthy eyes among the future generations."

Relics Of Bronze Age

That the urn and human bones found recently near Jedburgh, Scotland, belong to the late bronze age, or about 1000 B.C., is the opinion of officials of the Scottish national museum of antiquities. The blackened condition of the bones indicates that the body had been cremated, cremation or incineration being common at that time.

A new kind of compass which shows the magnetic lines showing from buried geological formations as big as whole farms or mountains has been perfected.

Agricultural Notes

Many Items Of Interest To The Western Farmer

In Canada the European war in found only in the province of British Columbia.

The major commercial crops in Canada producing table stock are turnips for export are Ontario and Prince Edward Island.

According to prevailing estimates the Canadian sugar beet acreage in 1933 was about 2 per cent lower than in 1932.

The total annual production of clover and grass seeds in Canada has remained about the same in recent years.

Canada has a world-wide reputation as a producer of alkali, Ontario seed having dominated world markets in quality and price for many years.

The Canadian milling industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

There appears to be a good future for certain varieties of prunes grown in Canada for drying purposes. The imports of prunes in 1932 fell to \$585,327 from \$717,025 in 1931.

The expansion of tobacco production in Canada, from 13 million pounds in 1921 to 54 million pounds in 1932 has given rise to difficulties in marketing the crop to advantage.

Green, wax podded beans, and also beans for baking, are staple products for which canner requirements depend upon crop conditions and carry-over, the domestic demand being fairly constant but the export prospect small.

In Eastern Canada many farmers who some time ago went out of sheep on account of poor fence protection are now in a position to go into sheep raising again, wire fencing being gradually substituted at a moderate cost for rail fences.

The Canadian milling industry furnishes an outlet for a relatively small amount of high grade malting barley grown in Canada. This demand has increased steadily in recent years, and in 1932, 5,441,000 bushels of barley were used by malsters.

The commercial production and demand for brome, western rye, and crested wheat grass seeds is practically limited to the prairie provinces, where last year 900,000 pounds of brome, 225,000 pounds of western rye and some 3,000 pounds of crested wheat grass commercial seeds were produced.

The increase in the 1933 potato crop in Canada over 1932 is partly due to increased acreage and partly to higher yields per acre in certain provinces. The 1933 crop is estimated at 41 million cwt., which is four per cent above 1932 and 10 per cent below the 1928-32 average production.

The acreage and tonnage of grapes in Canada has shown a steady increase since 1920. The future of the grape market is bound up with the wine industry, of the productive acreage of grapes in Ontario will over-supply the fresh fruit markets and the apparent winery requirements.

The increase in dairy cow and heifer population in the Western provinces points to a continuation in 1934 of the level of dairy production reached in 1933, providing that the range in relative prices between dairy products and beef remains the same.—The Agricultural Situation bulletin.

Like Good Old Days

Useful Home Production Idea Revived By Alberta Settlers

The "good old days" have come back to the rural district of Erskine, Alberta, with a return to useful home production. The same engine that has chopped a generous supply of wood for the summer months also makes chopsticks, grinds wheat into breakfast food. From hidden man fashion everything from moccasins to coats.

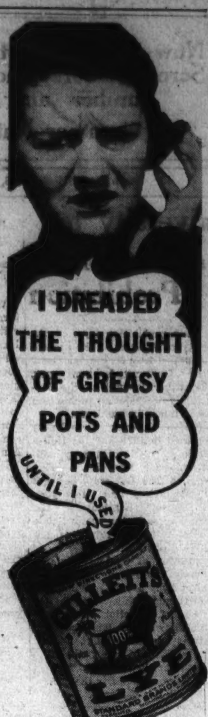

Sugar beets provide syrup which, combined with yeast, gives the settler vinegar, and women, so prolific in the knitting of socks, sweaters and caps, have revived tail of the old spinning wheel.

Teaching "Jiu Jitsu"

Miss Dorothy Curtis, recently returned from Japan where she has been teaching school for three years, has enrolled for her final year at the University of Wisconsin. In order to help pay expenses, she has organized a "jiu jitsu" class for girls. Miss Curtis, proficient in the art herself, says she has some promising students.

A resolution asking government control of key minerals as a method of war prevention, endorsed by the Vancouver Women's Canadian Club and the Calgary Business and Professional Women's Club, will be sent to the League of Nations Society, at Ottawa, for further action.

Mineral and fur resources of a vast area round Yakutat, Siberia, are being developed in a country whose only outlet is the Lena river, which is frozen seven months of the year.

It cuts through grease—makes messy kitchen jobs easy!

DON'T be a slave to kitchen chores. Just use a solution of one teaspoonful of Gillett's Pure Flake Lye dissolved in a quart of cold water. It puts an end to stubborn stains. Lifts grease and grime off like magic! Gillett's Lye is indispensable for all your heavy cleaning... for stoves... up drains... for toilet bowls. Order a tin from your grocer today. Say good-bye to hard rubbing and scrubbing!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Be sure to get the new revised Gillett's Lye Booklet... it tells how this powerful cleanser and disinfectant will lighten dozens of household tasks. Contains full information for soap making, thorough cleaning and other uses on the farm. Write for free copy to Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ont.

GILLETT'S LIFE EATS DIRT

A Double Nasturtium

New Flower Developed By Successor To Luther Burbank

A double nasturtium that "looks like an asparagus and ranges in color from lemon yellow to scarlet," has been developed at Philadelphia. It was created by David Burpee, who has continued the work of Luther Burbank in developing new varieties of plants.

The new flowers have attracted considerable attention at the recent local flower show, where they have been called "the poor man's orchid."

Six out of ten people have one leg shorter than the other, according to a noted physician. Is that why they run around in circles?

The Caspian sea is the world's largest inland sea.

33 Get exactly the color you want from the new Instant Rit range of colors. Instant, because it soaks right and STAYS... never loses streaks or spots... and makes everything you use it on positively lovely.

YOU'LL HAVE "BETTER LUCK" WITH RIT. NEW! No longer a soap! Discoloring instantly.

Figures Recently Released Show The Important Position Held By Agriculture In Canada

A graphic illustration of the increase in farm production in Canada since 1880 is found in a figure compiled by the Dominion Bureau of Statistics.

Production of wheat, the great staple crop, mounted from 42 million bushels in 1880 to over 420 million bushels in 1930, an increase of ten-fold. The increase of oat harvests from 39 million to 423 million bushels was over fivefold. Other grains although grown on a smaller scale have shown even greater relative advances. The rate of increase of field crop production has been much greater than that of animal products, livestock and animal products having roughly doubled in the same period. Cattle sold and slaughtered have increased from 868,000 to over 2,000,000 and swine sold and slaughtered from 1,800,000 to 3,800,000. Production of milk and eggs has likewise been doubled. The area of field crops, given as 15.6 million acres in 1880, had grown to 38 million acres in 1931, an increase of 245 per cent. during the forty-one years.

In 1880 the total agricultural output was valued at 294 million dollars, with the mineral output valued at 17 million, and the manufactures amounting to 476 million dollars. Agricultural production in 1930 had risen to 1,268 million dollars, mineral production to 280 million, and the value of manufactures to 3,429 million. Although the value of agricultural products relative to manufactures had fallen from 62 per cent. to 37 per cent. as industrialization gradually expanded, the growth of manufacturing depended in no small part upon expansion in agriculture. In 1931 the value of farm products used by manufacturers was over 30 per cent. of the value of all materials used, and approximately 25 per cent. of the gross value of products manufactured was accounted for by manufactures of Canadian farm origin.

About 17 per cent. of the value of all export trade in 1930 was made up of wheat, barley, oats, rye, seeds, vegetables, fruits, tobacco, hay, cattle, hides and skins, milk and cream. These products formed 25 per cent. of the value of all exports in 1930.

Maple Syrup For England

Effort Being Made To Introduce Popular Canadian Product

Maple syrup, known for its delightful flavor throughout North America, is not so well known in Europe and the consumption there is confined largely to Canadian and American residents, states the Natural Resources Department of the Canadian National Railways. Treacle, or molasses, golden syrup and ordinary granulated sugar are the ingredients commonly used by the English housewife in the preparation of dishes similar to those in which maple syrup and maple sugar are used in Canada. The same applies to Scotland where the joys of pancakes with maple syrup are quite unknown. Efforts, however, are being made to introduce Canadian maple syrup and sugar into the United Kingdom and it is anticipated that as the people acquire a taste for these products the demand will increase.

Trained Nurse For Dogs

Ritz Pets In Atlanta Can Have Expert Attention

Dogs that travel in the upper strata at Atlanta, Georgia, can have their own special trained nurse when they feel indisposed.

Nursing dogs just like trained experts from the hospitals nurse people is the career that Mrs. Arthur J. Jones, of Atlanta, has adopted. And she is kept busy caring for the ritz pets hereabouts. When a high-powered Pomeranian or fop-topped Chow gets sick and Mrs. Jones is called in on the case, she goes to the patient's home, takes charge of the sick room, under the veterinarian's instructions and administers his prescriptions and diets just as a trained nurse takes charge of a human patient.

She got her early training under a veterinarian in Texas, and has worked with most of the veterinarians in Atlanta since.

Serves Two-Fold Purpose

Headlight Of New Streamlined Train Has Vertical Beam

The headlight of the new streamlined railroad train is designed to serve a two-fold purpose. In addition to directing a powerful beam of light far down the track another shaft of light of great brilliancy is shot directly upward far into the sky. This vertical beam is designed to serve as an extra factor of safety, as it can be seen at great distances and warns motorists and others of the approaching train, thus eliminating the danger of collisions.

It was not until after the civil war in the U.S. that the tomato reached the northern states, although well-known in the south.

W. N. U. 2044

People Becoming Robots

Small Per Centage Are Thinkers In This Machine Age

Sir Ernest Benn, speaking at a luncheon of the Incorporated Sales Managers' Association in London, declared that there were not 2,000,000 people in the world who could think. The youngster of to-day, he said, starts in an education machine which is a mass-production machine. When he goes to work his whole life must be regulated. Outside his work he reads a newspaper produced to attract the coppers of the million. He listens to the wireless, and has the soul destroying experience of knowing that he is applying his heart and mind—so far as he has got any—to the same time or words that a million others are absorbing. He goes to the cinema, and, whether he likes it or not, absorbs all the atrocities that come out of Hollywood. This young man is being compelled to become a Robot in a fatalistic scheme of things which must cause him to believe that he can count on very little. In Russia, and Italy the people were doomed to ignorance by order. The same process was beginning in Germany.

Coal Found Near Alkavik

Will Prove Boon To Residents Of Remote Districts

Discovery of reputed good quality of coal in the barren outlying districts of Alkavik promises a boon to scattered residents of this little community, isolated on the outer edge of the Arctic rim.

Discovery of the vein, six feet deep and within a few miles of the settlement, would eliminate the difficult haul by scow of 20 miles from Fort Norman, and would bring a dependable supply of coal, described in quality as equal to the best lignite of Edmonton mines.

At present the main source of fuel is the rapidly thinning scrub bushes along the winding shores of the river, and the shipments of coal from Fort Norman. The imported coal, however, is of soft quality and "powders" too easily to be used extensively. Cost of \$20 per ton also is almost prohibitive for settlers, and even in institutions such as the Hospital of England mission and hospital crude oil is used extensively.

Improved Grain Varieties

Saskatchewan Wheat Pool Encouraging Junior Grain Clubs

As part of the established policy of encouraging the development and wider use of improved grain varieties, the Saskatchewan Wheat Pool organization is now co-operating with the Extension Department of the University of Saskatchewan in providing registered seed for junior grain clubs.

At present there are approximately 40 junior grain clubs organized in the province. Under the arrangement recently entered into with the Extension Department, the Pool organization undertakes, wherever requested, to finance any properly organized club in the matter of securing registered seed. Upon receipt of application the company orders registered seed for clubs, on the understanding that the money is repaid without interest in the fall.

The field crops branch of the provincial department of agriculture is co-operating with the Pool in locating suitable registered seed on an economical basis as possible. Agents of Saskatchewan Pool Elevators at points where junior clubs are established, are in a position to give all necessary information regarding the arrangement.

The plan was carried out last year in a limited way, and worked out very satisfactorily. It is now being widened in scope.

Canada And World Peace

Dominion Cannot Become Divorced From Foreign World Affairs

"Canada is part of a world scene, whether we like it or not. If she does not make up her mind about war and peace, it will be made up for her," stated Professor T. W. L. McDermott, national secretary of the League of Nations Society, and formerly a staff professor of history at McGill University, in addressing a meeting of the Canadian Club at Regina. He spoke on "Canada and World Peace."

"While Canada's wheat products, for example, have been feeling the effects of the economic isolationism abroad, she has been drawn into that policy herself, striving like everyone else to sell and forgetting or refusing to buy. But for her the question is 'To buy or not to sell,' he stated.

The professor also said that in economic and political matters there is either a path leading to peace and security or one leading to war. If we refuse to do business with others, to exchange goods or to arbitrate disputes, we shall have war. We fight the economic war with low wages, and a declining standard of living. We fight the political war with soldiers and arms. But one leads to the other."

The First Skyscrapers

Chicago Started Ideas For Construction Of High Buildings

Frank Lloyd Wright believes that the skyscraper is doomed and that the American architecture of the future "will grow out of the inward nature of the American people." Is not Mr. Wright thus assuming the role of prophet? Not even the Chicago metropolis of the monotonously flat prairies, gave the world the first of these cloud-piercing structures. A desire in other cities to increase ground rentals helped to popularize Architect Jenney's construction methods. Not even the lure of profits, however, explains the giants of the post-war boom. Research has shown that the taller the building, above twenty stories, the smaller its chances of success. Yet, from New York to Chicago and San Francisco and from Minneapolis to San Antonio, modern skyscrapers have reared their towers and minarets and turrets thirty, forty, even 102 stories above street levels.—Chicago Daily News.

Honesty Of The Orient

Japan paid 2,000,000 gold francs to the League of Nations and officially interpreted the action as meaning that, though that country resigned from the league, it intends to pay its obligations promptly while still legally a member. The payment checked league circles considerably because some other countries owe a total of some 22,000,000 francs in membership fees.

Some English Humor

A plague of wasps is predicted this summer. So look out for Community Stinging.

"A new nation is being born in Austria," says a writer. Judging by the noise, people were beginning to suspect that it was twins.

A septuagenarian says that fifty years ago women were much prettier than they are to-day. Well, they are fifty years older now.

"Young men and women of to-day," says a writer, "are quite content to take back seats." This point has been confirmed at all the best cinemas.

A writer states that seventy million telegraph-forms are wasted every year. But it isn't clear whether or not this number includes the forms on which Scotsmen write their letters home.

Rubber erasable forms are predicted this year. We already have bouncing babies to go inside.

At the latest mannequin shows music appropriate to the frocks is being played. Some of it must be almost inaudible.—Punch, London.

Automatic machines are causing a saving of over \$100,000 a year in the savings bank department of the British post office.

Half a million radio sets are to be distributed in rural districts by the Soviet government.

SOME PHOTOGRAPHERS ARE LUCKY

The press photographer who "shot" this picture admitted it was his lucky day, and we agree with him. A motorcyclist travelling down Newbridge Hill over the River Dart, in Devonshire, suddenly stopped as the wheel of his sidecar went flying through the air, and the photographer released the shutter of his camera at the critical moment.

Figures Are Discouraging

Highway Accidents In Canada Increasing At Alarming Rate

Ontario drivers are not maintaining the safety record they set up during 1933. According to figures issued by the Motor Vehicles Branch of the Ontario Department of Highways, the number of reported accidents in February showed an eight per cent. increase over the same period last year, and it was during cold weather—under favorable conditions—that the increase occurred. If there were any indication, anywhere, that the Canadian motorist was beginning to learn how to drive in safety, the figures on traffic fatalities would not be so discouraging. We could say, in that case, that the long list of deaths—can simply be because the motor car still was a relatively new bit of machinery, and that things would work themselves out, once everybody got the hang of it.

But we can't say that. Far from learning to handle our cars safely, we are making a worse record now than five years ago. Far from learning to handle these new machines, we are getting worse. Fatalities are increasing at a discouraging rate.—Guelph Mercury.

Large Meat Consumption

Great Britain Has Highest Average And Italy Lowest

We cannot vouch for the figures that follow but they seem to come from a trustworthy source. Large slaughter-houses in this country number 1,600 besides innumerable small local killing places. Four footed animals killed for food number 120 millions, not including those butchered on farms and in small local butcheries. The average amount of meat eaten in the United States was 145 pounds in 1921, a decrease of about 20 pounds per person since 1900. Europe's average consumption is around 70 pounds per person, Great Britain's average the highest, Italy's the lowest; Japan's consumption is 1.5 pounds per person for a year and 25 pounds of fish. In large sections of the world practically no meat is eaten because of religious scruples.—Our Dumb Animals.

Predicts Many Icebergs

Lieutenant Commander Edward H. Smith, United States Coast Guard, an expert on icebergs, predicts that this year approximately 630 icebergs will come south of Newfoundland toward trans-Atlantic shipping lanes. He has been studying meteorological conditions for several months in European and North Atlantic countries.

England Claims To Have 144 Millionaires To America's 20

The black-browed albatross of the Falkland Islands lays eggs as large as dinner plates.

FEDESTRIAN'S LUCK

—The Humorist, London.

Britain Has Met New World Conditions With Less Violent Change Than Other Countries

Walter Elliot, the British Minister of Agriculture, in his recent broadcast, which wound up the "Whither Britain" series, made some profoundly interesting observations which have application to Canada as well as to Great Britain. He described agriculture as still the greatest industry in Great Britain and being in danger of dying from a surfeit of liberty. "Any man is free to grow anything he liked here under any conditions, and any man is free to grow anything he liked anywhere abroad and send it here equally without any conditions." And he pointed out: "The liberty to grow anything and the liberty to buy everywhere are clearly not working out satisfactorily in practice." This has led to the voluntary discipline of British agriculturists, who have accepted the boards set up under the Marketing Acts. Mr. Elliot has acknowledged frankly that his method is one of trial and error, but it is already meeting with some success, and he claims that Great Britain has met the new world situation with less violent change than any other country. He faces and accepts the world move towards economic nationalism, and believes that "the Western countries will have to solve in future far more of their own problems at home than they have done in the last 180 years."

Timothy Seed Production

Production In Canada Is Still Considerably Short Of Requirements

Domestic production of timothy seed in Canada is still far short of consumption, so that still further production of this crop may be encouraged. According to the Agricultural Situation bulletin, timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 5½ cents per pound for the seed. Canada uses annually about 10 million pounds of timothy seed and until 1931 some 9 million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some five million pounds in 1932, but declined to about 2,700,000 pounds in 1933 due to unfavorable weather conditions.

Can Stage Sun Eclipse

New Device Of Astronomers Reported to Academy Of Sciences

Joshua, who commanded the sun to stand still, will have nothing on modern astronomers when they start using a new device reported to the National Academy of Sciences. With it, say the machine's proponents, you can stage an eclipse of the sun any time you want to, without waiting for one of the rare occasions when the moon drifts across Old Sol's face.

The device will be chiefly useful, said Dr. A. M. Skellett of New York City, for studying the Corona, the mysterious pearly streamers of light which extend from the sun's atmosphere of thousands of miles into space.

Another astronomical instrument so sensitive that if set up in New York it could register the heat and light of a candle burning across the Atlantic in Paris was described by Dr. Joel Stebbins of the University of Wisconsin.

With it astronomers can learn the colors of stars too far away to be studied by telescopes, Stebbins declared.

Beginning And End

Famous Physician Gives Interesting Facts About Birth And Death

The majority of babies enter this turbulent world at its quietest time, between two and five o'clock in the morning. Strangely enough, most people depart this life at the very hour when Napoleon insisted man needed the greatest courage—four o'clock in the morning. These conclusions are reached by a famous physician, Dr. Edward Jenny, after prolonged study. Dr. Jenny discovered that the number of births increases rapidly towards midnight, reaches a maximum between two and five in the morning and falls off to a minimum late in the afternoon. There is a difference of 40 per cent. between the number born around 5 p.m. (12,257) and 5 a.m. (17,254). A similar rhythm is found in the pulse rate, blood pressure, rate of breathing and other organic activities during the course of twenty-four hours. The death rate, too, follows a cycle. Although most deaths occur in the hour mentioned, Dr. Jenny deduced that invalids should fear the hours when day is changing into night, and the hours when night is changing into day. Dawn and dusk. The hours of death, however, are not so marked as the hours of birth.

Egg Grading Regulations

Revision In Effect For Most Of The Provinces Of Canada

The revised egg regulations are now legally in effect for domestic trading in all the provinces of Canada, with the exception of Prince Edward Island and New Brunswick, and, according to general reports, the new standards are being found much more satisfactory than the old ones. One point which shippers should bear in mind, says the Department of Agriculture, Egg and Market Poultry Review, is that all eggs in the different weights of grade A are required to be "clean." Clean means free from spot or stain.

There has been some tendency to place "reasonably clean" eggs in this grade, and in the past the grade of A medium replaces the old grade of A. The requirements for cleanliness in grade A medium and grade A pullet are precisely the same as in grade A large. "Reasonably clean" eggs, which in the past went into the grade of First, now go into grade B. Cracked eggs are required to be packed separately and marked "Cracks."

U.S. Farmers Receive Aid

Huge Amount To Be Paid Out By End Of 1934

United States farmers, already enriched by nearly \$200,000,000, will pocket \$1,065,000,010 in benefit payments before the end of 1934.

An analysis of expenditures to be made by the farm administration during the present year in its wheat, corn, hog, corn, tobacco, and dairy reduction program indicates it has only begun to approach its spending stride.

Up to April 1 the administration had paid out \$179,702,885 to farmers who agreed to reduce their cotton, wheat and tobacco acreage. Benefit payments to corn and hog farmers are just beginning to trickle out, the dairy program is in its formative stages, tobacco farmers have received only a portion of the money coming to them, and the second payment to wheat farmers is yet to be made.

Would Remind Canadians A resolution urging that Canadian women married to foreigners and continuing to reside in Canada be allowed to retain their nationality was passed at a meeting of the Canadian Alliance for Women's Vote in Quebec, under the presidency of Miss Idola Saint Jean. The resolution was forwarded to Premier R. B. Bennett.

An attachment for typewriters has been invented that renews the ink ribbons as they are being used.

Three British doctors recently succeeded in isolating the virus of influenza.

It is said that the latest police test for drunkenness in London is to make a man tie a screw tie without a mirror. If he succeeds... he's drunk.

May Bar Slot Machines Egyptian Government Says Permits Will Not Be Renewed

Coin-operated games as well as certain types of vending machines may be prohibited in Egypt. The minister of the interior has notified the owners of the machines in question that permits for their use will not be renewed. A long campaign against gambling machines has been carried on by various elements in Egypt, including influential newspapers. The great majority of all the games are of American manufacture.

It is said that the latest police test for drunkenness in London is to make a man tie a screw tie without a mirror. If he succeeds... he's drunk.

Three British doctors recently succeeded in isolating the virus of influenza.

Sound Banking PROTECTS the Community

The Bank of Montreal works constructively and conservatively for the protection of its depositors and the community as a whole.

Because the Bank has, for more than a century, endeavoured to do this, it has come to be regarded throughout the length and breadth of the Dominion as a sound, safe and friendly institution.

Make the nearest branch your banking headquarters — a place to which you can go regularly to transact your banking affairs, to obtain information, and to discuss with the Manager your plans and problems.

Third Annual
FEDERAL DAY, LACOMBE
Wednesday, June 6
The Central Alberta Live Stock Feeders' Association are holding their annual Feeding Day at Lacombe on Wednesday, June 6th.

Some 2000 range cattle and 2000 range lambs were fed under contract in Central Alberta the past winter. This stock has made good money for both the rancher and the feeder.

The programme starts with lunch at the Experimental Station, which will be followed by short talks dealing with different phases of live stock feeding and marketing by prominent live stock men who are well qualified to deal with the subject under discussion. This will be followed by a short visit to a few of the feed lots of the district.

The annual meetings of the Central Alberta Live Stock Feeders' Association will be held during the evening in the Town Hall, Lacombe at 8 p.m.

Everyone who is interested in the feeding of high quality range beef cattle and lambs for profit, should take this opportunity of finding out how the members of the Central Alberta Live Stock Feeders' Association, who are feeding live stock under contract, are converting low priced grain into high priced export product.

Come early and look over the Experimental Station before lunch. Bring your basket for a picnic lunch. Coffee, cream and sugar will be provided.

This is your invitation to come and bring with you as many of your friends as possible who are interested in this development of the live-stock industry.

OTTAWA LIVES TWO PROVINCES ON HIGHWAYS

Ottawa, May 22.—Saskatchewan and Alberta will be assisted by the federal treasury with loans up to \$750,000 each to enable them to proceed with road building operations this year, according to orders-in-council passed under the relief act and made public Monday. The amounts will be advanced as the work proceeds and will be secured by provincial treasury bills at five per cent interest.

That the assistance to the province announced from Ottawa, to take the form of treasury loans for road-building purposes, is good as far as it goes, seems to sum up the feeling in Alberta government circles, but until further details are available as to terms of this and other hoped-for federal aid Hon. O. L. McPherson, minister of public works, says he is not in a position to comment.

Road-building operations can and will be undertaken to the full sum of the \$750,000 loan, says Mr. McPherson, but just where and when will have to be figured out in the light of this definite appropriation. Out of the entire program of possible and desirable work, that is to say, a list of projects most urgent and practicable will now have to be decided upon to fit the amount available. The minister is unable to say how quickly this can be done, but steps will be taken to set the wheels in motion.

TOWN OF LACOMBE NOTICE

TAKE NOTICE that it is the intention of the Council of the Town of Lacombe to undertake the construction of a sidewalk on the west side of Alberta Street from Barnett Avenue north to the continuation of Bailey Avenue as a local improvement in accordance with Section 334 of The Town and Village Act, 1924, 60 per cent. of the cost of such local improvement to be borne by a special assessment against the lands benefiting thereby, and the remainder to be borne by the Town at large.

AND FURTHER TAKE NOTICE that it is the intention of the said Council to raise the sum of one thousand and (\$1,000.00) dollars for the purpose of repaving certain sidewalks in the said Town of Lacombe, the cost to be borne by the Town at large.

Dated this 23rd day of May, 1934.
Lewis P. Minkler,
Secretary-Treasurer

That expert water finder and well digger, D. F. Belknap, this week at a depth of about 40 feet, brought in a flowing well on the property of Ned Pearson, next to Exhibition grounds.

Flying Stones, Mud, Oil or Water can't harm the Sturdy Mechanism

CHEVROLET'S Knee-Action is of a very special type. In this construction, the coil spring, which is the heart of the mechanism, is safely and solidly enclosed in a heavy steel housing. This keeps out dirt and flying stones, protects the spring from wear, tear and exposure. The result: a smooth, restful Floating Ride... a bounceless back seat... and completely shock-proof steering with no annoying shake, shudder or shimmy when the front wheels meet a bump. Choose a Chevrolet and make sure you get the safety type of Knee-Action in your next car.

FRASER LAYTON BADLY INJURED

Fraser, son of Rev. R. B. Layton, was the victim of a serious accident on Monday evening last, and is in a critical condition at present writing. Fraser is a clerk in the Royal Bank, Camrose, and on Monday evening while visiting at the home of another clerk, the boy attempted a practical joke on him. It was the intention to fire off a firecracker behind him, while one of his friends held a revolver at his back, with the idea that when the firecracker exploded and he turned around to see what was happening he would see the revolver and think he had been shot. The revolver was supposed to be unloaded, but when the trigger was pulled a bullet entered Fraser's back, and passed through his right lung. His parents were notified and, immediately left for Camrose. It is the hope of his many friends here that he will successfully come through "his ordeal," and the greatest sympathy is extended to Mr. and Mrs. Layton and family.

KIDNAP ERROR WAS TOUGH ON SWEDISH HIKER

Rimby, May 21.—The thrills and terrors of a kidnap were experienced by A. Erickson, Swede fisherman, recently, but it was all a case of mistaken identity and kidnapers and kidnappes called it quits with no hard feeling.

Erickson, who makes his living principally by fishing in Pigeon Lake, walked to the Ester-McDougall saw mill in search of work and unable to get satisfactory employment, set out along the trail for Winfield.

On the winding back trail he lost his way when dark set in and, after walking miles, spotted a light in the distance.

Hoping for a night's shelter, he left his pack at the roadside and followed along the edge of the lake towards the light.

Suddenly two men sprang from the bush, overpowered him, bound his arms and forced him to proceed through the brush to a house in a clearing. Unable to speak English, his protests were misunderstood.

His abductors looked him in the chicken house until morning when they took him several miles to Justice of the Peace Barwick, who called in an interpreter. The mystery was all cleared up when the men explained they had been laying for an

unknown person who had been molesting their traps.

But, having had sufficient trouble, Mr. Erickson decided to forgive all and they parted pals.

DEATH OF

MRS. MARY McDOWELL

Mrs. Mary McDowell, after an illness extending over several months died at her home here on Monday last, in her 89th year. The funeral was held on Wednesday from the United Church, and was attended by a host of friends of the deceased family. Deceased came originally from P.E.I., and has lived in the west for many years. Of her immediate family two sons, E. E., of Ponoka, Len. of Teas, and one daughter, Miss McDowell, of P. E. McLeod's staff, Lacombe, two sons in P.E.I., and two sons in Maine, and one daughter in Kelowna, B.C., survive.

**WORLD HAPPENINGS
BRIEFLY TOLD**

The Italian 7,000-ton cruiser Emanuele Filiberto was launched recently.

His Scotch lassie destined to become Canadian bride. Disembarked from the liner Duchess of York at Halifax recently.

Mrs. John Cherry, aunt of Arthur W. Cutten, Chicago wheat king, is dead at her home at Galt, Ont. Frank L. Cutten, Medicine Hat, Alta., is a brother.

German unemployment decreased last month by 719,588 persons, according to insurance companies, and 574,000, according to employment bureaus.

The Northwest Mounted Police force was established in 1873; it became the Royal Northwest Mounted Police in 1905 and has since been renamed the Royal Canadian Mounted Police.

Jews in various parts of London have appealed to the police for protection against persons who have been covering their houses and shops with anti-Semitic labels.

Germany is placing extensive orders for aeroplane motors in England, the Daily Mail reported. Bids were called for and one manufacturer alone received an order for 180 motors.

One of the largest sums ever received as "conscience money" came to Hon. R. C. Matthews, minister of national revenue, in the form of a bank draft for \$5,400. The letter containing the draft was postmarked Montreal.

Firing of the royal salute by cannon on land and answering barkers from the guns of the warship Rochester, marked celebration April 24 of the centenary of St. Helena, the lonely little island in the South Atlantic, as a crown colony. Napoleon died there in exile in 1821.

Some Idiotic Contests

Craze For Needle Threading Is Most Foolish One Yet

We are told by the ladies who write pieces for the paper that the needle-threading craze has reached Vancouver.

This entertaining form of folly consists of an open competition in which the contestants vie with each other in seeing which one can jam the most threads through the eye of a needle.

We have had successfully dance marathons, rocking chair marathons, hog-calling contests, rolling pin heaving matches, flagpole sitting, piano-playing marathons and even liars' contests.

But we respectfully submit that this frenzy for threading needles is the most insane one of the lot.

Idiotic contests seem to be in our blood. We just can't shake them off. So let's establish another one.

Instead of competing with each other to see who can dance longest or call a hog the loudest, why not compete to see who can devise the outlandish kind of a contest to keep the other nuts busy?—Vancouver Sun.

Banns Instead Of License

"Depression Practice" Cost Alberta \$9,000 Last Year

Hamilton (Ont.) is not alone in its loss from marriage license revenue. The same condition exists in Alberta, and it cost the province \$9,000 in 1933 because young couples had their marriage banns announced in church rather than pay the \$6 license fee. "All denominations are doing it now," said Donald Mackie, provincial statistics registrar. Hamilton city reported revenue loss of \$1,000 because of the "depression practice."

The "husks" eaten by the prodigal son in the Bible parable are identified in a Mediterranean legume with St. John's bread, says Llewellyn Wilf, a sweet edible pulp, which is called liana, botanist.

Many a man who gets his back up like a camel acts like a bear.

**IT'S LIVER THAT MAKES
YOU FEEL SO WRETCHED**

Wake up your Liver Bile

No Calomel necessary

It is the liver that makes you feel so wretched. Without it, life is a misery. It is the liver that makes you feel so wretched. Without it, life is a misery.

W. N. U. 2146

Nova Scotia Scintillat

Will Return From New Guinea With Valuable Specimens For American Museum

Austin L. Read, Nova Scotian scientist who led a party of explorers into the wilds of New Guinea, will arrive in New York soon with hundreds of specimens for the American museum of natural history.

The letter was written from Read's supply base in New Guinea just after he and his companions had brought to a successful conclusion their trip into the mountainous region and were about to start a big-game hunt in the western region which has not been entered by collectors for half a century.

Read did not mention his personal hardships in the New Guinea mountains, where head-hunting natives were encountered according to other reports of the expedition. Only his work, the study of the bird life, was sketched in the brief note. On the mountain expedition the collectors secured 150 specimens.

One was a bird five feet tall and weighing 70 pounds. On the west coast trip the collectors expected to add at least 100 other specimens.

**Noted British Aviator
May Enter Parliament**

Amey Mollison Aspires To Membership In Conservative Party

Having flown the seven seas and all the continents, Amey Mollison, British ace woman flyer, now wants to become a member of parliament. And her husband, James A. Mollison, trans-Atlantic aviator, agrees with her.

When her plan was first announced, Amey took a severe "razing" from the British newspapers. But she refused to be discouraged and already Conservative party headquarters is trying to find her a constituency. If her flights of oratory are as intensive as her flights in aviation, she may soon be able to place the letters "M.P." after her name. She said:

"I have something to offer. First, a university education with a degree in economics, which would enable me to bring technical knowledge to the study of national affairs."

Second, a deep interest in national affairs, which would enable me to bring technical knowledge to the study of national affairs. Second, a deep interest in national affairs, which would enable me to bring technical knowledge to the study of national affairs.

The Whitewash Brush

Press And Pulpit Have To Use It On Occasion

A clergyman came to a newspaper man this way: "You editors do not tell the truth. If you did you could not live; your newspaper would be a failure." The editor replied: "You are right and the minister who will at all times and under all circumstances tell the truth about his members, alive or dead, will not occupy the pulpit more than a great Sunday, and then he finds it necessary to leave town in a hurry. The press and pulpit go hand in hand with whitewash brushes and pleasant words, magnifying little virtues into big ones. The pulpit, the pen, and the press are the great maintaining triumvirate." And the editor turned to his work and told of the unsurpassing beauty of the bride, while in fact she was as homely as a mud fence.—Cranbrook, B.C., Courier.

Telephotograph Service

Plan To Carry Service Over Every Section Of United States

The Associated Press announced the inauguration of a telephotograph service, which it plans to begin operating late this year from at least 25 "key" cities.

The announcement was made at the organization's annual meeting and was followed by an extended discussion by members of the feasibility and adaptability of the service, which will carry telephotographs to every section of the United States.

Modern improved telephotograph machines based on an entirely new process, which operate in full daylight, will be used. Leased wires, extending from coast to coast, will be employed in transmitting news and feature pictures from positive prints. The telephotographs will be received as negatives.

The Logical Thing

From London comes a casual announcement of a Great Mice Show, to be held at St. Albans, Hertfordshire. The prizes are valued at \$100, and go doubt the best mouse will be awarded also a trip to Hollywood to meet Mickey, says the Christian Science Monitor.

"Is that painting intended to be a picture of a sunset or a sunrise?" "It must be a sunset. I knew the artist, and he never got up in time to see a sunrise."

The man who has to say "I am a gentleman," isn't.

New Dictator In East

Ruler Of Vast Empire Was Once Poor Refugee

In the growing list of dictators King Ibn Saud, now engaged in a new Arabian war, must take a prominent place. He is the most powerful ruler, and the biggest personality, in the whole of the Middle East.

Thirty-five years ago he was a poor refugee. One day, with only six followers, he captured his native town from the Turks, killed the governor, and held out against all comers. That was the beginning of his power.

He formed a highly trained army of religious fanatics, and now, at the age of 53, rules a vast empire with the help of motor cars, modern firearms, the telephone, and other Western inventions. He is a man of powerful physique, and has married and divorced a hundred wives.

During the war Colonel Lawrence and the Arab Bureau at Cairo regarded him as of little account, but he has proved too strong for the puppets they created.

One of his most trusted advisers is an Englishman turned Mohammedan, St. John Philby, who has a house in Hampstead and was in London recently.—News Of The World.

Precious Glass Of Water

University Of Michigan Values It At Ten Thousand Dollars

The most precious glassful of water in the world—\$10,000 worth—is under lock and key in the University of Michigan laboratories, guarded as jealously as radium.

It is "heavy water" in its pure state deuterium oxide, discovered only two years ago and valuable in the treatment of cancer. Prof. J. C. Halford, Leigh C. Anderson and John R. Bates have worked out a plan to increase the university's valuable supply to two quarts within two years.

A report on the process was given at the meeting of the American Chemical Society in St. Petersburg, Fla. Prof. Halford hopes that the water may some day prove valuable in curing the ailments of old age.

Winnipeg Newspaper Union

By Ruth Rogers

Oxygen is a gas without color, taste or odor. It is a little heavier than air and would be unsuitable for filling zeppelins. It is very slightly soluble in water, 100 cubic feet of the gas under ordinary conditions. There is, however, enough of the gas dissolved in water to supply the needs of fish, which are cold-blooded.

This gas does not burn itself, but it supports burning or combustion. It combines with a large number of other elements. This tendency is not very great at ordinary temperatures, but at higher temperatures oxygen reacts very vigorously, usually giving off heat and light. The substances produced when elements combine with oxygen are known as oxides, and the process is called oxidation.

Many oxides occur in nature as valuable minerals and ores. Oxygen is not only the most abundant element but the most important, because life, heat, and light are largely dependent upon it. Considerable quantities of oxygen are used for cutting and welding metals by the oxy-acetylene blow torch. Oxygen in tanks is used to restore the supply in the air of submarine boats. It has been found that aviators who ascend to high altitudes, where the air is rarefied, get only half the usual amount of oxygen and so become "dopey". An equipment has been designed to supply the oxygen from a tank through a connecting tube to a face mask covering the mouth and nose.

Physicians sometimes use oxygen tanks for patients who are suffering from pneumonia or suffocation.

Good Advice For Parents

Dr. Norman O. Hutton, a pastor in Wellesley, Mass., said a wise thing when he declared: "You cannot guarantee the security of your children with wealth. Leave them moderately poor if you would do well by them. Bring them up to appreciate the finer things of life and let them live simply. These are the best guarantees you can leave them."

And the beauty of the whole thing is that the average parent can live up fully to this ideal.

"You're Next" is the epitaph recently carved on a barber's tombstone in Madrid, Spain.

Smokers in Canada altogether paid into the revenues of the Dominion during the 11 months of the past year \$24,362 as imports on tobacco in its various forms, with the duties on cigarettes supplying about two-thirds of this total.

CYCLING TRAVELLER

You can have your autos and planes. Ian Ross MacFarlane, of Washington, is sure he can get about quite as well on a bicycle. He is shown at New York after arriving on the liner Champlain following five years travel abroad. He toured Europe and Asia on his bicycle, winning the distinction of being the first to cross the Syrian desert in that manner.

Little Journeys In Science

(By Gordon H. Guest, M.A.)

It has been known for centuries that the air contains at least two components—an active and an inactive one. More than a thousand years ago the Chinese called the active part yin (oxygen). They discovered that this active gas combined with sulphur, with charcoal, and with some of the metals. The inactive part is nitrogen.

Experimentation shows that approximately one-fifth of the air is made up of this active gas known as oxygen. This element not only occurs in the air but is found most abundantly combined with other substances. It comprises nearly 80% of the earth's crust, about 80% of water, 65% of the human body, and too very large part of such substances as saltpetre, limestone, brick and mortar.

Oxygen is a gas without color, taste or odor. It is a little heavier than air and would be unsuitable for filling zeppelins. It is very slightly soluble in water, 100 cubic feet of the gas under ordinary conditions. There is, however, enough of the gas dissolved in water to supply the needs of fish, which are cold-blooded.

This gas does not burn itself, but it supports burning or combustion. It combines with a large number of other elements. This tendency is not very great at ordinary temperatures, but at higher temperatures oxygen reacts very vigorously, usually giving off heat and light. The substances produced when elements combine with oxygen are known as oxides, and the process is called oxidation.

Many oxides occur in nature as valuable minerals and ores. Oxygen is not only the most abundant element but the most important, because life, heat, and light are largely dependent upon it. Considerable quantities of oxygen are used for cutting and welding metals by the oxy-acetylene blow torch. Oxygen in tanks is used to restore the supply in the air of submarine boats. It has been found that aviators who ascend to high altitudes, where the air is rarefied, get only half the usual amount of oxygen and so become "dopey". An equipment has been designed to supply the oxygen from a tank through a connecting tube to a face mask covering the mouth and nose.

Gardening

Early Planting Usually Ensures An Early Harvest

Now that May has arrived it should be fairly safe to try a few rows of those vegetables which are not usually sown until later. If frost does come along, there is a small loss as the ground can be used over again, whereas if the stuff pulls through there is the satisfaction of having from one's own garden, vegetables unusually early. Beans, potatoes, corn, tomatoes and a few of the other tender and semi-tender vegetables can be treated in this way. With hardy sorts like spinach, radish and lettuce, one can make the first sowings just as soon as the ground is fit to work. Frost may then hit but it will not hurt them. Handle the end of the planting season in the same way, that is make a sowing or two after the usual time for planting, so that there will be stuff coming along weeks after the main crop has been picked.

Some people desire to include some fruit with the garden. In the prairie provinces or Northern Quebec or Ontario, there are some, new hardy types as well as good crabapples available. Among sweet cherries, Winesap, Bing and Tartarian are recommended, while Montmorency and Early Richmond are standards of the other type. Plums are grown almost anywhere in Canada, as well as currants, raspberries, strawberries, blackberries, thimble berries, loganberries, and gooseberries.

There are few gardens, indeed, where one cannot work in screening material to advantage. Even if there are not dog kennels, chicken runs and telephone poles to be hidden, the garden can be secured by selecting the right type of annuals. For instance, African Marigolds, Cosmos, Ornamental Sunflowers, Larkspurs, Castor Beans, and other bushy, fairly tall plants will make satisfactory screens by early July. Among the climbing ones, an annual nature there are Morning Glories, Nasturtiums, Sweet Peas, Hops, and Scarlet Runner Beans.

The old gardener was right in planting peas early. Like the flowering kind it does not seem as if the garden variety can be put in too early. Invariably the biggest crops are produced by the early sown rows. On this account it is best to plant all the peas about the same time, and that is just as soon as the soil will work. To be on the safe side, in these parts of the Dominion where late and very heavy frosts are liable to occur it might be well to put half the peas in at the first possible sowing date and the remainder about 10 days later. When the climate is mild and the growing seasons goes into late September sometimes a fall crop can be harvested from July to August sowing. To ensure a long harvesting period, and with a vegetable like this the season cannot be too extended, it is advisable to sow early, medium and late varieties. The first sorts are ready in about 50 days while some of the later ones do not start coming on until a fortnight later. The taller, large podded sorts are generally considered the sweetest and best, but they take up more room. For best results they should be provided with brush or strings for support or can be sown broadcast. Peas, like corn, have a flavor all their own when cooked within an hour of picking.

Revenue From Smokers

Millions Paid To Government In Taxes On Tobacco

Consumption of Canadian cigarettes increased during the past fiscal year compared with the year before. The total entered for consumption for the first 11 months of the past year was 4,017,074,385, according to a return tabled in the House of Commons. For the entire fiscal year 1932-33 the total was 3,728,832,089.

Carbon Black Plant

First Plant Of Its Kind In Canada To Be Established In Alberta

The first carbon black plant in Canada, on the farm of C. R. Eddin, nine miles north of Craigmyle, 122 miles east of Calgary, is expected to be in a production state by July.

Several weeks ago Mr. Eddin received a special government permit to produce carbon black.

The plant is being built by a firm to be known as the Pioneer Carbon Black Co. Ltd., at an estimated cost of \$20,000. In addition, more than a dozen wells will be drilled on the Craigmyle farm.

Drilling a water well 15 years ago, Mr. Eddin struck a flow of about 35,000 cubic feet of dry gas at the 450-foot level. Ever since he has had an abundant supply of gas for use on his farm. In 1923 he drilled two more wells to the same level, and obtained flows of approximately 100,000 cubic feet a day from each.

During the past 12 months, Mr. Eddin has produced with an inadequate plant of his own a total of about 350 pounds of carbon black which he has disposed of to a paint firm in Calgary. The product has a market value of 11 cents a pound. At present carbon black used in Canada is imported from the United States.

Will Fly Small Machine

Girl To Pilot Last Word In Speed Planes

When Henrietta Lantz competes in air races throughout the country this summer she will be flying what is perhaps the last word in speed aeroplanes.

A tiny ship 15 feet long and with the same wingspread is being constructed at Los Angeles for her. It is expected to have a maximum speed of between 280 and 290 miles an hour, powered with a Menasco six-cylinder motor.

The aeroplane to be christened Henrietta Lantz-Jaquis, will cost close to \$17,000. It will follow in design the French hydroplane which recently set a world's record of 465 miles an hour.

Two years ago Miss Lantz won the Los Angeles-Cleveland women's air derby, and has had a consistent race winner at Chicago, Los Angeles and Cleveland. She claims never to have had an accident.

Dr. W. A. Jaquis, Hollywood veterinarian, and George Buzza, art publisher, are financing her venture. She plans to take the aeroplane to New York shortly after June 1, when it has completed its tests.

Recipes For This Week

(By Betty Barclay)

CARAMEL BON BONS

1/2 cup sweetened condensed milk which has been caramelized
3 cups confectioner's (very fine ground) sugar
1 teaspoon vanilla

1 cup butter or coconut oil chopped into nuts

To caramelize, place a can of sweetened condensed milk in a kettle of boiling water and keep at boiling point for three hours. Be sure the can is kept covered with water. You can prepare several cans at a time and open them from week to week as desired. Open up the can of caramelized sweetened condensed milk and blend the contents with sifted confectioner's sugar. Add vanilla. Drop by teaspoonfuls onto toasted coconut or chopped nut meats. Form into patties or balls. Chill in the refrigerator.

POTATOES, PEAS AND CARROTS

To two cups of mashed potato add one-quarter cup heavy cream, 1 teaspoon onion juice, 1 beaten egg yolk, 1 teaspoon sugar, salt and pepper to taste. Boil in a double boiler. A ring of this on a shallow buttered baking dish. Fill centre with cooked peas and carrots seasoned with sugar, salt and pepper. Dot potatoes with butter. Bake just long enough to heat thoroughly and lightly brown potato.

All-Important Fact Should Be Kept Before Investors

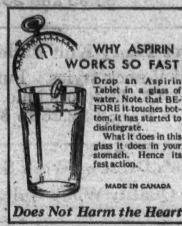

Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, etc. The fastest relief, it is said, is discovered. These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after reaching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And that is ready to go to work almost instantly. When you buy, though, be on guard against substitutes. Be sure you get ASPIRIN's quick relief, for a sure is on every label of Aspirin.

Does Not Harm the Stomach

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl," etc.

SYNOPSIS

Camilla Hoyt and Peter Amos, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis West, another wealthy girl who has quarreled with Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarreled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has rubbed some of her work, send for her and offer her a salary of \$50.00 a week to start and a prospect of promotion. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis West rents a room on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is deeply impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along. They quarrel and they quarrel. After Camilla has gone from the studio, Avis West calls and persuades Peter to accept a loan of \$1,000.

(Now Go On With The Story)

CHAPTER XII

Camilla told Rose then of the disagreement between Peter and herself. She found some relief from her confidence in a sympathetic listener. Rose nodded soberly. "I expected it. You might have known it would not work out."

"But, Rose, if this way doesn't work, what? It seemed to be the best plan in every way."

"The best plan would have been to wait until Peter was established before you married," emphatically. "But that might be five years. And we love each other so!"

"Sure, that's just the trouble, no matter what class the man is in or whether it's a case of love or duty. The next best thing in your case would have been for you to let Peter take care of you and make the best of everything he could give you and anything he could do for you, even if you had to live on practically nothing but love."

"Oh, but that would have ruined Peter's career!"

"And what is your occasional wife plan doing for it?"

Camilla sighed and gestured helplessly. "I don't know. That's just it. Nothing is right."

Rose offered cheerfully. Oh, he will get over it and everything will be okay again until you let Peter take care of you and make the best of everything he could give you and anything he could do for you, even if you had to live on practically nothing but love."

"Oh, but that would have ruined Peter's career!"

"And what is your occasional wife plan doing for it?"

and sew the lace on the machine. That will be much better and save me a lot of time." She was collecting her things as she talked. She stood before the mirror and adjusted a red velvet over her soft black hair, buttoned the collar of a tweed coat under her chin. "Chilly out, isn't it?" she asked Peter.

"Rather," he replied. "You don't mind going out alone?"

"I should say not! It's early yet. Well, goodbye, you two. See that you treat our guest right," she admonished Camilla with a wink.

"Nice kid," said Peter, when she had gone. "Too bad she hadn't a chance like you."

"I don't know. In many ways, Rose is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry," he confessed.

"So am I, Peter. But that's all over. Let's forget it ever happened." She was in his arms, with her arms around his neck, close.

"My precious! I wish it hadn't happened. But we'll start all over again, just as if it hadn't. Except please, dear, don't say any more about that." Which is the way men apologize and repent, with no retractions or concessions. They regret what has happened, but somehow the woman is still wrong in the opinion.

"But like all women in love, it was enough for Camilla that he once more held her close instead of drawing away from her, that his eyes looked deep into hers and confessed, "I was I who had the black-blues that time. I haven't felt low as long as I can remember. But everything is going to work out all right, somehow." His optimism was a happy surprise to Camilla. Hereafter it had been she who encouraged him. This mood must be the rebound from the depths of his recent despair. It was so delicious to relax in his arms and in the buoyancy of his mood.

"You just forget that the kind of thing you are doing can't be accomplished in a minute. And the best things in life always take time to accomplish."

"I don't mind waiting for a reasonable time. I get panicky sometimes when I think about some of the old boys of the past who had to die before the world would recognize them. I may not be a genius in their class, but look at the fellows like Pericles. He died penniless, leaving a play that has survived for two centuries."

"Tell me about him. I don't know the story," Camilla prompted.

"His story fits plenty of others like him. But he wrote a masterpiece on his deathbed when he knew he was doomed to die, and in extreme poverty. The play was a tremendous success from the first, but he lived for only a month after the premiere. He died of a fever that—audiences roaring at the humor of his play while he suffered the last agonies of a slow death. And the play is still a success—just revived in London last season and made such a big hit that they're bringing it to America. Such a story!"

"But, darling, genius gets a better break these days than it did two centuries ago."

He nodded. "That's what makes the struggle worth while; that, and hoping that even if I'm not recognized while I'm living, I might produce something that would add to the beauty of the future. Sculpture is more enduring, at least, than a book or a picture that can be hidden away or lost."

Had Camilla known what power sustained his hope and confidence, she might have been less happy in sharing it. But she supposed that Peter's naturally buoyant nature had lighted itself in his conviction over their quarrel, and that he was seeking out his problem to satisfy his own peculiar pride. She did not know that he had died that evening with Avis, and had brought away with him some of her faith in himself and her own ultimate victory.

She was to discover in the days which followed that if you once put love away for even a little while, and then take it out again—it is never the same. It is like a flower that is so fragrant and beautiful that you want to keep it forever and put it away between the pages of a book to treasure with memories; but when you take it out again, it is not at all the same gorgeous thing that you once had in your hands.

(To Be Continued)

Montreal Cabbies

With the marked decrease in the number of cabbies' licenses issued in Montreal last year, the question of allowing motor vehicles to travel on Mount Royal again looms as a contentious issue. Last year, according to Mr. Lamoureux, who is in charge of the permit department at the city hall, there were only 96 cabbies' licenses which is a decrease of 25, as against the figure for the preceding year.

Veteran—"Anyhow, there's one advantage in having a wooden leg."

Friend—"What's that?"

Veteran—"You can hold your socks up with thumb tacks."

It took 300 years to popularize the potato in Europe, and only dire necessity forced the country cottager to include it among his vegetables.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know this woman's experience. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation and was so ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. There is no sign of constipation. I would advise anyone suffering the same to take Kruschen." (Mrs. M. R. L.)

The immediate effect of the six salts in Kruschen is to promote a normal flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Kruschen brings is lasting relief.

Visits Giant Liner

Prince Of Wales Thinks Cunard Ship Is Wonderful

Making a surprise visit to the shipyard at Glasgow, where the new giant Cunard liner 534 is under construction, the Prince of Wales inspected upon being hoisted 200 feet up the side of the ship in a riveter's cage to watch the placing of beams on the upper decks.

Construction officials stood motionless below the half-plated side of the vessel and turned their faces upward with alarm as the small elevator, in which the Prince stood nonchalantly, jerked on its rise to the top of the ship.

Before the officials recovered from their surprise the Prince was seen walking along the vast unprotected expanse of A deck and peering over the side through the network of girders. More than a thousand workmen who went back to work April 3 after a two-year layoff saluted the British heir with a crescendo of hammering which he acknowledged by raising his hat.

Officials heaved a sigh of relief as the Prince started to descend from the ship in the elevator. But as the cage reached half way down the side, he ordered it halted, and climbed through the lower framework, exposing himself to fresh perils from falling rivets.

"She will be a wonderful ship," he remarked to officials when he finally returned to safety after spending nearly an hour inspecting it.

Three-Cent Treasury Note

Rare American "Greenback" In Possession Of Montreal Man

One of the first "greenbacks"—a treasury note for three cents, issued in Washington in 1863—was discovered at Montreal in the possession of a man from failing rivets.

The note aroused much interest when the owner took it to the bank to see if it was of any value.

The "three-cent bill" is about two and a half inches long and one and a half inches wide and is printed in black and white on one side and in green and white on the other. The face of the note states it was issued by "Act of March 3, 1863," and receivable for all United States stamps, and was issued only by the assistant treasurer and designated depositaries of the United States.

The bill is marked "United States Fractional Currency—Treasury Department."

New Russian Loan

Big Domestic Loan Running Ten Years Announced By Soviet Government

The issuance of a new domestic loan, aggregating 3,500,000,000 rubles and running 10 years, has been announced by the Soviet government.

It will be known as the "loan of the second year of the second five-year plan" and carries the optional choice of either a lottery or interest-bearing bonds, which will pay 10 per cent. annually.

Will Be National Guest

Dutch Author Making Cruise Around The World On Cunarder

Francisco

When Hendrik Willem Van Loon, famous Dutch author, aboard the Cunarder Francisco, making a voyage of re-discovery of old world via the Southern Hemisphere, will be made a cruise around the world via the Southern Hemisphere, arrives at Semarang in Java, he will be greeted by a large committee of his countrymen, many of whom serve Holland there in official capacities. He will also be officially greeted in Batavia and Djokjakarta. He will be a national guest.

Van Loon's first stop in Dutch territory will be in New Guinea, with calls at Kalabahi and Bali before reaching Semarang.

Because Van Loon was born in Holland and has brought credit to his country by the fame he has achieved in the literary world, the passengers of the Francisco will share in the honors that will be shown to him.

One of the excursions to be offered to Mr. Van Loon will be a drive to the Temple of Borobudur, illustrating the finest Pagan sculpture in the world. There is a very romantic story connected with the building of this exquisitely beautiful temple.

The temple, dating back to the seventh century, is one hundred feet longer than the great pyramid of Cheops and one-third its height. It rises in five terraces, connected on each end of the structure by staircases. Each terrace encircles the temple. No less than three miles of frieze is wrapped round and round the huge structure, the carvings illustrating the ethical development of Prince Gautama, the apostle of Buddhism.

According to the traditional legend, Borobudur was built to win the affections of a capricious young woman. She insisted that the architect, should design, construct, and complete the finest temple on earth as a wedding gift to her. She stipulated that it should be perfect in every detail.

He secured the services of the greatest sculptors and builders of his time, and in the course of a busy year the temple was completed. The architect conducted his lady love to a tour of inspection, his heart full of pride in the work he had done. He was told that the temple was the work of thousands of figures decorating the walls and terraces, she found one statue that was unfinished. She coldly reminded her lover that the conditions had not been fulfilled. She told him to go and finish the work, and later married a more favoured youth.

Ancient Royal "Cure"

Edward The Confessor Introduced Ceremony Of Gold "Touch Feasts"

The two Charles II gold "touch feasts" recently offered for sale in London serve as reminders of the time when monarchs were supposed to cure the disease known as "the king's evil," which was a kind of plague. The "cure" was effected by the sovereign laying hands on the afflicted person, who was then presented with "touch" pieces. Edward the Confessor introduced the ceremony into England, and the power to heal in this manner was supposed to become hereditary in the royal line.

Usually the "touch" pieces were of gold, but during the troubled days of the reign of Charles I, gold being scarce, silver coins were often bestowed, though sometimes the Royal physician had to discharge the patients empty-handed. This strange custom was at its height in the reign of Charles II, who proclaimed divine seasons when "public healings" should take place. Those afflicted with "the king's evil" had to be recommended for "touching" by the parish minister or church wardens. During one period of four years the king "touched" nearly 24,000 persons. On Easter Sunday, 1686, Louis XIV. touched 1,000 sick persons, uttering the words: "The king touches thee; may God cure thee." Fifteen shews were given to each French patient and thirty to each foreigner.

Then He Learned

In the smoking room of a club two business men just passed middle age were criticizing the young men of today.

Said one: "Look how reluctant young men are to marry and settle down."

"That's so," replied the other. "They seem to fear marriage. Why before I was married I didn't know the meaning of fear."

Comparing Figures

The Grout Zepplins can be propelled for 20,000 miles at a cost of \$1 per mile. Comparing the cost of operating one of the long passenger trains, last reports showed the average cost per passenger train mile in Canada as \$2.34, and per passenger car mile 37.6 cents. Freight receipts averaged 1,019 cents per ton-mile.

Was Unique Contest

Pipe smokers boasted their praise to C. F. Jones, winner of a most unique contest at Calgary. By keeping his lowly cornob alight for one hour and 32 minutes he defeated 185 contestants in a race for a title of sorts. Only one match was used.

To Carry Pilgrims

Cunard Line To Make Trip From New York To Buenos Aires

Next Fall

A special sailing of the Cunard line, Francisco, at present on her cruise around the world via the Southern Hemisphere, will be made next fall from New York to Buenos Aires to carry pilgrims to the Bucharian Congress to be held there.

The Francisco will leave New York on September 18th and will call at Havana, Cuba; Port of Spain, Trinidad; and Rio de Janeiro, Brazil, on her way to the Argentine capital, where she will arrive on October 10th.

Here the ship will remain for four and one-half days, serving as a hotel for the passengers and allowing ample time to attend the ceremonies conducted by the Bucharian Congress, as well as to enjoy the beauty of the largest city in the Southern Hemisphere, the metropolis of South America, popularly known to travelers as B.A. The city has a population of considerably more than two millions, occupying Rio de Janeiro by nearly six hundred thousand.

Buenos Aires is a combination of Paris, New York and Chicago. In architecture it resembles the French capital, and in the style of society that makes Paris the mecca for Europeans. In wealth and love of amusements it is like New York. The lovely Argentine women are the industry it reminds the traveler of Chicago, being like the American city a mere pleasure centre. One fourth of Argentina's population lives in Buenos Aires, the largest Latin city in the world.

A unique feature of Buenos Aires is that it is a paradise for women. With beautiful Spanish and Italian eyes, and a sparkle therein that would do honour to Madrid or Rome, these lovely Argentine women are virtually like princesses. They are not won by mere smiles, as is the case in countries where girls are plentiful.

Buenos Aires is situated one hundred miles up the Rio de la Plata, which river here looks more like a bay, being nearly thirty miles wide. The city is flat, and is between sixty and seventy feet above sea level. The name, Good Air, fits it perfectly.

Buenos Aires is modern and attractive in appearance. The cathedral is a noteworthy structure and commands a beautiful location. The Teatro Colón is an architectural masterpiece. The Avenida Mayo, the city's main thoroughfare, is declared to be the finest street in the world. Vehicular traffic on the Calle Florida, the city's Fifth Avenue, is suspended between 11 and 12 o'clock, and 7 p.m. making it a safe and fashionable promenade. Hotels are numerous and of high order. Horse racing is the national sport and is conducted throughout the year.

Some of the greatest daily newspaper, La Prensa, is published in Buenos Aires. The building which houses the newspaper is one of the new ones of the city. Visitors are welcome.

On her northward voyage the Francisco will touch at Montevideo, R. de Janeiro, Port of Spain and Havana, reaching New York on November 4th. The entire voyage will occupy forty-seven days.

The travel arrangements are under the joint direction of Thos. Cook & Son, the American Express Company and the Cunard Line.

THE RHYMING OPTIMIST

By Aline Michaelis

EXPLORERS ALL

Though on no unknown seas do we embark,
Nor do we search for any fabled land,
Down treacherous canyons in forests deep and dark,
Or stumble, parching, over desert sands,
Yet still we are explorers all, who grope
Through the strange continent of self to find
The wells of beauty and the source of love,
And soul's most secret ways that twist and wind.

We are explorers all, with flags unfurled
In conquest where we gain our being's springs
And glimpse the promise of another world,
God's infinite realm which around our small self sings.
How far man journey all earth's lands to win,
But farther they who thread the maze within!

Unusual But True

So unusual is it to have a no-accident year on streets of large cities that Belleville's record without a fatality in 1933 raised doubts and brought a request for a check-up to Chief Constable for verification of the report. Fortunately it was true. The chief constable was able to notify the registrar of the Motor Vehicles in Ontario that there were no motor fatalities in this city during 1933.

Highest Wind Velocity

The highest wind velocity ever measured—231 miles per hour—was recorded recently at Mount Washington, New Hampshire, official records revealed. The previous record, also established at this mile-high observatory—highest observatory in the country—was 164 miles on April 5, 1933.

Handshaker Approached a Businessman

A handshaker approached a businessman and said: "I have a dollar for a bite to eat, will you?" he asked. "A dollar," gasped the man. "For a bite to eat?"

"Just say 'yes' or 'no,'" replied the tramp. "Don't tell me how to run my business."

HOW TO FIND OUT IF YOU HAVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness, Frequent Headaches, Stomach Pain, Indigestion, Loss of Appetite, Morning Nausea, Sour Stomach, Auto-intoxication

WHAT TO DO FOR IT:

Take 3-4 capsules of Phillips' Milk of Magnesia every morning when you wake up. After each capsule wait 30 minutes before you go to bed. Take the new Phillips' Milk of Magnesia capsules—each capsule is as effective as 10 grains of Epsom salts.

IF YOU HAVE ACID STOMACH, DON'T WORRY ABOUT IT. FOLLOW THE SIMPLE DIRECTIONS GIVEN ABOVE. THIS SMALL DOSE OF PHILLIPS' MILK OF MAGNESIA ACTS AT ONCE TO NEUTRALIZE THE ACIDS THAT CAUSE HEADACHE, STOMACH PAIN AND OTHER DISTRESS. TRY IT. YOU'LL FEEL LIKE A NEW PERSON.

But—be careful you get genuine Phillips' Milk of Magnesia, or you may get a cheap imitation. Phillips' Milk of Magnesia capsules are made in Canada when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the same as the capsules. It is made in Canada when you buy—25c and 50c sizes.

Little Helps For This Week

"I was afraid and went and hid thy talent in the earth, lo, there thou hast that is thine." Matthew 25:25.

Time was I shrank from what was right.

From fear of what was wrong; I would not brave the sacred fight.

Because the foe was strong.

But now I cast that finer sense And sorer shame aside; I dare set on doing right, though I am weak, for I am brave, and I am true.

—J. H. Newman.

If the really devout man falls into some error he does not fret over it, but rising up with a humble spirit he goes anew on his way rejoicing. Were he to fall a hundred times in the day he would not despair, he would rather cry out lovingly to God appealing to His tender mercy and pity. The really devout man has a horror of evil, but he has still greater love for that which is good, he is more set on doing right than avoiding wrong. Generous, large-hearted, he is not afraid of danger in serving God, and would rather run the risk of doing His will imperfectly than not strive to serve Him lest he fall in the attempt. —Jean Nicolas Gruen.

An Expensive Luxury

Costs Small Fortune Every Year To Run A Yacht

Those who know say it costs \$150,000 a year to run a yacht like Mr. Astor's Nymphenburg. It is air-conditioned throughout, has a wood-burning fireplace in the living room and carries a crew of 40. A double bottom makes it safe and a gyroscope stabilizing device keeps it from rolling.

A banker once asked J. P. Morgan about the cost of keeping a steam yacht he intended to buy. Mr. Morgan replied: "More than you can afford."

The banker drew back and asked: "How do you know I can't afford it?"

Morgan replied: "Because if you have to worry about what it will cost you to run it, I know you can't afford it."

British Grant For Horse Breeding

The British war office has sanctioned a grant of \$25,000 for encouragement of breeding of light-bred horses this year. A special amount is set aside for native pony breeds, in danger of extinction.

The Isle of Wight last year had more sunshine than in any twelve-month since 1885.

A National Park Of 40 square miles has been presented to South Rhodesia.

Economy Sale Successful

Lacombe's first attempt at putting on a community sale, in which every business in town was represented, came to an end on Saturday last. It was a wonderful success, hundreds of people who had not visited our town in years came in to take advantage of the money-saving offerings and went home satisfied.

Rains on Thursday and Friday had the effect of keeping many buyers away, but Saturday, with fine weather, the town was crowded from morning until midnight. Extra help had to be put on by the store to handle the crowds, and all report a great increase in business.

The effect of the advertising sent out for this occasion cannot be estimated from immediate gains, and no doubt it will be felt for months. The committee that had the affair in hand deserve much credit for the able manner in which details were looked after. Valuable experience has been gained which will be useful in any other campaign. The free picture shows for the children and the free baseball games on Friday and Saturday evenings, were all well patronized and enjoyed.

SPRUCEVILLE NEWS

The afternoon meeting of the U.F.W.A. will be held at the home of Mrs. W. P. Young on Wednesday, May 30. Mrs. Price, Provincial President of Statler, also our Director, Mrs. Carter, of Ponoka, both will take part in the meeting. There will be special music and a good meeting is planned for. We extend a hearty welcome to all the ladies of the community.
Mr. and Mrs. Harry Gale spent Sunday with Mr. and Mrs. Dave Boden.
Miss Jean Southward, Vera Burton and Cecil Proudfoot, all have been elected delegates to attend the Junior Conference at Edmonton, the first part of June.
We are pleased to report Mrs. John Morter is improving.

MRS. REED'S PUPILS RECITAL

United Church, Lacombe, Wednesday, May 30 at 8:15
One of the annual musical treats in Lacombe is the Recital given by the piano pupils of Mrs. F. H. Reed. Every year for this concert Mrs. Reed brings in some well-known artists from Calgary or Edmonton. This year the assisting artists will be Miss Eleanor Agnew, the popular concert violinist and teacher, of Edmonton, accompanied by Miss Helen Barbour. The Lacombe public school chorus, which competed in Red Deer, will sing their two festival numbers, under the direction of Mr. Wright. A collection will be taken at the door, the proceeds to be used for tuning the musical instruments of the Church, and the purchase of hymn books.

EASTERN STAR TEA

\$20.25 was realized from the tea held on Saturday under the auspices of the Order of the Eastern Star, in aid of the Junior Red Cross of Calgary. The spacious rooms of Mrs. R. L. Ramsey's home, which were beautifully decorated with lilacs and other spring blossoms, provided a delightful setting for the tea, which was well attended. Guests were entertained by Florence Hall and Lorna Craig, soloists and Margaret Watt, violinist. Mr. L. Wright, accompanist. Waitresses wore the Red Cross Nurses' uniform. Mrs. J. M. Scherrer and Mrs. G. E. Mann poured tea and others assisting were Mrs. J. R. Marshall, Mrs. J. MacKenzie, Mrs. L. Douglas, Mrs. W. Rankin, Mrs. A. Jenkins, Mrs. J. L. Craig, Mrs. W. Gramma and Mrs. P. Preston.
